

30^{-DAY}

DIGITAL PRODUCT MASTERPLAN

*From a blank page to your first buyers
in 8 chapters and 30 days.*

FIND * VALIDATE * BUILD * LAUNCH * SELL

About this book

30-Day Digital Product Masterplan

All rights reserved. This book is for educational purposes. You are welcome to use the frameworks, templates and scripts inside to build your own business, but please do not resell or redistribute the book itself.

Income disclaimer

Nothing in this book is a promise or guarantee of income or results. Digital product sales depend on your idea, your audience, your effort, your timing and many factors outside anyone's control. The examples, prices and percentages used throughout are illustrations to help you think and plan, not predictions.

Professional advice

This book is not legal, tax or financial advice. Rules about business registration, taxes, payments and consumer protection differ from country to country. When it matters, check with a qualified professional in your location.

Tools and platforms

Apps, platforms, features and fees change often. Tools are mentioned as examples, not endorsements. Always check each tool's current pricing, policies and availability in your country before you commit.

Contents

Welcome | Read This First 4

Chapter 1 | Find Your Winning Idea 7

Chapter 2 | Pick Your Niche & Audience 14

Chapter 3 | Validate Before You Build 21

Chapter 4 | Plan Your Product 27

Chapter 5 | Create It Fast 34

Chapter 6 | Make It Look Premium 41

Chapter 7 | Set Up Your Launch 48

Chapter 8 | Launch & Get Your First Buyers 56

Conclusion | What Comes Next 64

30-Day Tracker 65

Read This First

You do not need a big audience, a fancy brand or a year of preparation to sell your first digital product. You need a real problem, a clear promise and a simple plan to follow.

That is what this book gives you. Over eight chapters and thirty days, you will move from *"I think I should make something"* to *"my product is live and people are buying it."* Every chapter ends with clear daily actions, so you are never left wondering what to do next.

Who this book is for

- Beginners who have never sold anything online.
- Creators and freelancers who want income that does not depend on trading hours for money.
- Students, parents and busy professionals who can spare 60 to 90 minutes a day.
- Anyone who has started and stopped a product before and wants a finish line.

What counts as a digital product?

Anything you create once and can deliver as a file or online access, again and again: ebooks and guides, templates, planners, checklists, prompt packs, printables, spreadsheets and short courses. There is no shipping, no inventory and no printing cost.

The 30-day map

Chapter	Focus	Days
1. Find Your Winning Idea	Choose a problem worth solving	1 – 3
2. Pick Your Niche & Audience	Know exactly who it is for	4 – 6
3. Validate Before You Build	Test real interest first	7 – 10
4. Plan Your Product	Structure, features and content	11 – 14
5. Create It Fast	Write and assemble with AI and simple tools	15 – 20
6. Make It Look Premium	Design, formatting and perceived value	21 – 23
7. Set Up Your Launch	Sales page, pricing, payments, promo	24 – 27
8. Launch & Get Your First Buyers	Instagram, objections, first sales	28 – 30

Five rules for the next 30 days

1. **Start from the problem, not from your passion.** People pay to fix problems and reach goals.
2. **Done beats perfect.** A good product that exists will always outsell a perfect one that does not.
3. **Evidence over opinion.** Trust what people do and say, not what you hope.
4. **Use AI as your assistant, not your replacement.** You bring the experience and judgment.
5. **Show up daily.** Thirty small steps beat one heroic weekend.

HOW TO USE THIS BOOK

Read one chapter, then complete its Action Steps before you move on. Keep a notebook or a single document open and write your answers as you go. Worksheets and templates are placed exactly where you need them. A 30-day tracker waits for you at the back.

Your starter toolkit

You can complete this entire plan with free or low-cost tools. Pick one in each category and avoid tool-hopping.

Need	Examples	Cost
Writing	Google Docs, Notion, MS Word	Free
AI assistant	Claude, ChatGPT or similar	Free or paid
Design	Canva, Figma, Affinity	Free or low
Selling	Gumroad, Payhip, Stan Store, Lemon Squeezy	Free to start
Promotion	Instagram (plus an email list tool)	Free

Before you begin: take 5 minutes to write down why you are doing this. A sentence is enough. On day 12, when motivation dips, you will want to read it.

CHAPTER

01

Find Your Winning Idea

Choose a digital product idea based on a real problem people want solved.

DAYS 1 - 3

IN THIS CHAPTER YOU WILL

- + Understand why starting with a problem beats starting with a passion
- + Discover where real, painful problems can be found for free
- + Compare the main types of digital products
- + Score your ideas and pick one winner with confidence

A winning idea is not the most original idea. It is the one where a specific person has a real problem, wants it solved, and is willing to pay for a faster or easier way out.

The Problem-First Principle

Most failed digital products begin with a sentence like *"I love this topic, so I will make a product about it."* The creator then spends weeks building and wonders why nobody buys.

Winning products begin with a different sentence: *"These people are struggling with this, and I can help them get to a better place."* The difference is subtle but it changes everything. You are no longer guessing. You are answering a need that already exists.

"Nobody buys a product. They buy a better version of their own life."

Three kinds of problems people pay to solve

Type	What the buyer feels	Example product
Pain	"This is hurting me right now."	Budget template for people drowning in debt
Goal	"I want to reach this and I don't know how."	30-day beginner running plan
Time	"I could do this, but it takes forever."	Ready-made content calendar for coaches

Notice the strongest markets are the evergreen ones: **health, wealth, relationships and self-improvement**, plus the people who serve them. Money, time and stress problems rarely go out of fashion.

Choose your product type

Your format should match the problem. A person who needs a decision needs a checklist. A person who needs a skill needs a guide or course. A person who needs speed needs templates.

Format	Best for	Build time	Typical price*
Ebook / guide	Teaching a process	1 - 2 weeks	\$9 - \$39
Templates	Saving time (Notion, Canva, Sheets)	3 - 7 days	\$7 - \$49
Planner / printable	Habits, organizing, routines	3 - 7 days	\$5 - \$25
Checklist / cheat sheet	Quick wins, low-price entry	1 - 3 days	\$3 - \$12
Prompt pack	Fast AI-powered results	3 - 5 days	\$9 - \$29
Mini-course	Skills that need demonstration	2 - 4 weeks	\$27 - \$97

*Illustrative ranges only. The right price depends on your niche, your promise and your audience.

BEGINNER RECOMMENDATION

For your first product choose an **ebook, a guide or a template pack**. They are quick to build, easy to deliver and easy to understand on a sales page.

Where to find problems worth solving

You do not need to invent problems. People announce them every day. Your job is to listen like a detective.

1. Your own life and work

What problem did you solve for yourself in the last two years? What do friends keep asking you for help with? Problems you have personally solved are great products because you already know the path.

2. Reddit, Quora and Facebook groups

Search your topic plus phrases like “how do I”, “struggling with”, “can’t figure out”, or “any tips”. Questions that appear again and again are demand signals.

3. Amazon and marketplace reviews

Open the best-selling books in a topic and read the **1-, 2- and 3-star reviews**. They tell you exactly what is missing: “too theoretical”, “no examples”, “too long”. Each complaint is a product opportunity.

4. YouTube and Instagram comments

Under popular videos and posts, people ask the questions the creator did not answer. Save the best ones.

5. Search suggestions

Type the start of a question into Google or YouTube and note what auto-completes. Those are real searches by real people.

ACTION STEP | BUILD YOUR PROBLEM BANK

1 Pick three areas you know something about or care about (for example: fitness, freelancing, parenting).

- 2 Spend 30 minutes per area collecting complaints and questions from the sources above.
- 3 Write down at least **30 problems** in the exact words people use. Copy phrases directly.
- 4 Circle the 5 that you see repeated, feel emotional, or come with “please help”.

Your Skills x Experience x Interest inventory

The best idea sits where a market problem meets something you can credibly help with. You do not need to be a world expert. You only need to be a few steps ahead of the person you are helping.

List	Write down
Skills	Things you can do well (organize, design, write, cook, code, budget, teach...)
Experiences	Hard things you have been through and solved (job search, weight loss, moving abroad...)
Interests	Topics you could read about for fun and not get bored for 30 days

The Idea Scorecard

Take your top 3 to 5 problems and turn each into a rough product idea. Then score each idea from 1 (weak) to 5 (strong) on these five criteria.

Criterion	Ask yourself
Pain intensity	Is this urgent or merely “nice to have”?
Reachable audience	Can I find and talk to these people online easily?
Willingness to pay	Do similar products already sell? Do people spend money here?
Speed to deliver	Can I create a useful first version in about two weeks?
My credibility	Do I have enough experience or can I borrow it through research and interviews?

Example scoring

Idea	Pain	Reach	Pay	Speed	Me	Total
Complete guide to personal finance	3	4	4	2	3	16
Monthly budget planner for freelancers with irregular income	5	4	4	5	4	22
Poetry about money	1	2	1	4	3	11

HOW TO READ YOUR SCORE

20 – 25: strong, move forward. **16 – 19:** promising, sharpen the idea.
Under 16: keep looking. Notice how the winning idea is narrow and specific. Narrow ideas are easier to explain, easier to sell and easier to build.

COMMON MISTAKES

Choosing a huge topic (“Health”), copying a trending product with no angle, choosing something you hate doing, or waiting for the “perfect” idea. There is no perfect idea, only a well-chosen first one.

DAY 1	Collect problems. Build your bank of 30 real complaints and questions.
DAY 2	Complete the Skills x Experience x Interest inventory. Turn your top problems into 3 to 5 product ideas.
DAY 3	Score every idea. Choose your winner and write it in one sentence: "I will help [who] to [do/solve what] with [what product]."

☐	I have a problem bank with 30 or more real quotes
☐	I know which product format fits my idea
☐	I scored at least 3 ideas on the scorecard
☐	I have chosen one idea and written it in one sentence

CHAPTER

02

Pick Your Niche & Audience

Define exactly who your product is for and what they need.

DAYS 4 - 6

IN THIS CHAPTER YOU WILL

- + Narrow a broad topic into a profitable niche
- + Write a clear customer profile that guides every decision
- + Learn to speak your audience's exact language
- + Study competitors and find your unique angle

“Everyone” is not a target audience. When you try to speak to everyone, you speak to no one. The more precisely you know who your product is for, the easier every later step becomes.

Why smaller is stronger

A niche is a small, specific corner of a larger market. It feels scary to narrow down because it seems you will lose customers. In reality you lose very few, because you gain what really matters: relevance. A person who sees a product made precisely for their situation thinks, *“this was made for me,”* and buys.

The Narrowing Ladder

Start with a broad topic and add one layer of specificity at a time: who they are, what situation they are in, and what result they want.

Level	Example
Broad topic	Fitness
+ Who	Fitness for busy mothers
+ Situation	Fitness for mothers with a newborn
+ Result	10-minute at-home workouts for new mothers to rebuild strength

Stop narrowing when you can picture an actual person reading your sales page and nodding. If you cannot imagine where to find 1,000 of them online, you went too narrow. If you cannot describe them in one sentence, you are too broad.

The Niche Statement

FILL-IN FORMULA

I help [SPECIFIC PERSON]
to [ACHIEVE SPECIFIC RESULT]
without [BIGGEST OBSTACLE OR FRUSTRATION]
using [YOUR PRODUCT].

EXAMPLE

I help **first-time freelancers** to **land their first three paying clients**
without **cold-pitching strangers all day** using a **30-day outreach**
playbook with copy-and-paste scripts.

Build your Ideal Customer Profile

Give your ideal buyer a name and a story. This is not busywork. You will use it to write your product, your sales page and every Instagram caption.

Question	Your answer
Who are they? (age range, role, life stage)	
What is their current situation?	
What do they want most? (the dream result)	
What frustrates them daily?	
What have they already tried that failed?	
What are they afraid of?	
Where do they spend time online?	
What makes them finally decide to buy?	

KEEP IT HUMAN

Do not write “women 25 to 45”. Write “Sara, 31, works full time, has two hours of free time a week and keeps buying planners she never finishes.” A real person is easier to write for than a statistic.

Jobs To Be Done: what are they really hiring your product to do?

Every buyer has three layers of motivation. Great products and great sales pages speak to all three.

Layer	Question	Example (budget planner)
Functional	What task do they need done?	Track income and bills
Emotional	How do they want to feel?	Calm, in control, no more money anxiety
Social	How do they want to be seen?	Responsible, someone who has it together

Collect your customer's language

The best copywriters do not invent words. They collect them. Go back to your problem bank from Chapter 1 and highlight the **exact phrases** people use: how they describe the problem, what they wish for, what they fear. Create a Voice-of-Customer list of at least 15 phrases.

WHY IT MATTERS

A guide for new managers might say “leadership development”. But the people who need it write: “I got promoted and now my old coworkers ignore me.” The second one is the headline.

Study the competition (it is good news)

Competition proves that people pay for solutions in your niche. A market with no competitors is usually a market with no buyers. Your goal is not to be the biggest. It is to be **clearly different** for a specific group.

ACTION STEP | COMPETITOR SNAPSHOT

- 1** Find 5 existing products that solve a similar problem (search Google, Etsy, Amazon, Gumroad, Instagram).
- 2** Record what they sell, the price, who it is for and what buyers praise or complain about.
- 3** Look for gaps: too long? No templates? Too generic? Outdated? No support? No examples?

Competitor	Price	Strength	Gap I can fill

Find your angle

You can differentiate without being “better”. Choose one of these angles and make it obvious on your cover and sales page:

- **Faster:** get results in 7 days instead of 3 months.
- **Simpler:** three steps instead of thirty.
- **More specific:** built only for nurses, teachers, students or beginners.
- **Done-for-you:** templates and scripts, not just advice.
- **Lower risk:** a smaller, cheaper entry point or a clear guarantee.

Your positioning statement

FILL-IN FORMULA

Unlike [COMPETITORS WHO...], my product [UNIQUE ANGLE] so that [AUDIENCE] can [RESULT] in [TIME].

COMMON MISTAKES

Writing “anyone who wants to improve” as your audience, copying a competitor’s promise word for word, or skipping the research because “I already know my audience”. Assumptions are expensive. Ten minutes of reading real comments is cheap.

DAY 4	Climb the Narrowing Ladder and write your Niche Statement.
DAY 5	Complete the Ideal Customer Profile and collect 15 or more customer phrases.
DAY 6	Run your competitor snapshot, choose your angle and write your positioning statement.

☐	My niche statement fits in one sentence
☐	I can describe my ideal customer like a real person
☐	I have a list of at least 15 phrases in their own words
☐	I have studied 5 competitors and know my gap
☐	I have a clear positioning statement

CHAPTER

03

Validate Before You Build

Learn simple ways to test whether people are actually interested in your idea.

DAYS 7 - 10

IN THIS CHAPTER YOU WILL

- + Understand what real validation looks like (and what it does not)
- + Use five simple methods to test demand before you build
- + Run conversations that reveal the truth
- + Decide whether to go, adjust or pivot, based on evidence

Validation protects your most precious resources: your time and your motivation. Spend a few days proving that people want your product before you spend weeks creating it.

Interest is not demand

“Great idea!” is the cheapest sentence in the world. Friends say it to be kind. Followers say it while scrolling. None of it costs them anything. Real validation is about **behavior**: people spending time, giving their email, or paying money.

“Compliments are cheap. Commitments are expensive. Collect commitments.”

The Evidence Ladder

Level	What happens	How strong?
1	Likes, comments, “nice!”	Very weak
2	People reply and describe their problem in detail	Moderate
3	People join a waitlist or give their email	Strong
4	People pre-order or pay a deposit	Very strong
5	Strangers buy the finished product	Proof

Your goal this chapter is to climb at least to **Level 3**, and ideally Level 4. You do not need big numbers. Ten people who clearly care are worth more than 1,000 who clicked a heart.

Method 1: The market check (1 hour)

Existing sales are proof that people pay for this kind of solution.

- Search your topic on Etsy, Gumroad, Amazon and Instagram. Are similar products selling? Look for review counts, “bestseller” tags and recent activity.
- Check search suggestions on Google and YouTube. Do your phrases appear?
- Search your keyword on Reddit or in Facebook groups. Are people asking about it this month, not just in 2019?

Green light: several competitors with real activity. **Warning sign:** zero products and zero questions anywhere.

Method 2: Talk to real people (the most powerful method)

Find 10 people who fit your ideal customer profile. Message them kindly, explain you are researching, and offer a 10-minute chat or voice note. Do not pitch. Ask about **their past behavior**, not their future intentions.

Five questions that reveal the truth

1. “Tell me about the last time you dealt with [problem]. What happened?”
2. “What have you tried to solve it? What worked and what didn’t?”
3. “What is the hardest part about it right now?”
4. “Have you ever paid for something to help with this? What and how much?”
5. “If you could wave a magic wand, what would the perfect solution look like?”

OUTREACH MESSAGE YOU CAN COPY

Hi [Name]! I'm researching how people handle [PROBLEM] and I'd really value your experience. Could I ask you 4 quick questions (about 10 minutes, by chat or voice note)? Not selling anything, just learning. Thank you!

LISTEN FOR GOLD

Strong signals: they describe the problem with emotion, they already spent money or time trying to fix it, or they ask "when can I get this?" Weak signals: "sounds interesting", "maybe later", "I'd probably use it".

Method 3: The social poll (30 minutes)

Use Instagram Stories, a Facebook group (where allowed) or a WhatsApp community to ask a question that forces a choice.

- "Which is harder for you right now: A or B?" (poll sticker)
- "What is your biggest struggle with [topic]? Reply and I'll send you something helpful." (question sticker)
- "I'm creating a [format] on [result]. Want early access? Reply YES."

A reply that says "YES" and tells you why is a Level 2 signal. A reply that arrives through a link and email is Level 3.

Method 4: The one-page waitlist (2 hours)

Create a tiny landing page with a headline, three bullet points of what they will get, and a field to join the early-access list. Free tools like Carrd, Notion pages, Google Forms or your selling platform's page builder are enough.

WAITLIST PAGE FORMULA

HEADLINE: [Result] in [timeframe] without [obstacle]

SUBLINE: A simple [format] for [audience].

3 BULLETS: What you'll get

BUTTON: Get early access (+ special launch price)

Share it in your Stories, bio and with the people you interviewed. Count real email signups.

Method 5: The pre-sale (the ultimate test)

The strongest proof is a payment. Offer an **early-bird price** to your first buyers before the product is finished. Be honest about it: explain what they will get, the delivery date, and a refund promise if you do not deliver.

PRE-SALE MESSAGE EXAMPLE

I'm finishing a 25-page guide that gives you a 30-day plan to [result]. The first 10 people get it at \$12 (it will be \$25 at launch) and shape the final version with their feedback. Delivery is in 14 days. Want a spot?

Even **3 to 5 paid pre-orders** from people outside your family is a loud signal that your idea has legs. If you are uncomfortable taking money before building, ask for a deposit or a “reserve my spot” signup instead.

How to decide: green, yellow or red

Signal	Green: go	Yellow: adjust	Red: rethink
Conversations	7 of 10 describe the problem strongly	3 – 6 of 10	Under 3
Waitlist (from 100 reach)	5% or more join	2 – 4%	Under 2%
Pre-orders	3 or more strangers pay	1 – 2 pay	No one pays
Market check	Active competitors	Few, outdated	None at all

These thresholds are rules of thumb for early-stage tests, not scientific laws. Use them to think clearly, not as hard guarantees.

If the result is yellow or red

This is not failure. It is cheap information. Do one of three things: **narrow** the audience further, **reframe** the promise around the problem people described, or **switch** to your second-best idea from Chapter 1. A few days of re-testing is far better than weeks of building something nobody wants.

COMMON MISTAKES

Asking only friends and family, asking leading questions (“Wouldn’t it be great if...?”), pitching during interviews, ignoring negative feedback, and treating likes as proof.

DAY 7	Run the market check and write 5 interview questions. Send outreach to 15 people.
DAY 8	Hold your conversations (aim for 8 to 10) and take notes in the exact words people use.
DAY 9	Launch the social poll and waitlist page. Share them in your Stories and with your contacts.
DAY 10	Offer the pre-sale to interested people, review all evidence and decide: green, yellow or red.

☐	I confirmed that similar products sell or people ask for help
☐	I spoke with at least 8 potential customers
☐	I collected waitlist signups or replies
☐	I tried at least one pre-sale offer
☐	I decided: go, adjust or pivot, based on evidence

CHAPTER

04

Plan Your Product

Create the structure, chapters, features and content of your digital product.

DAYS 11 – 14

IN THIS CHAPTER YOU WILL

- + Define the transformation your product delivers
- + Choose the right size and scope for your first version
- + Map your content backwards from the result
- + Create a full blueprint you can build from

Planning is where beginners either save two weeks or lose them. A clear blueprint turns a vague idea into a series of small, easy writing tasks.

Start with the transformation

Your buyer does not want information. Information is everywhere and mostly free. They want to move from where they are now (Point A) to where they want to be (Point B). Your product is the bridge.

Point A: Before	Point B: After
Overwhelmed, no clients, no plan	Three paying clients and a repeatable outreach routine
Spends money without knowing where it goes	A simple monthly budget and the first \$500 saved
Posts on Instagram randomly	A 30-day content system and consistent posting

WRITE YOUR PROMISE

By the end of [PRODUCT], you will be able to [SPECIFIC RESULT] in [TIMEFRAME] even if [BIGGEST DOUBT].

EXAMPLE

By the end of this planner, you will know exactly what you can spend each week, even if your income changes every month.

Minimum Lovable Product

You may have heard of a “minimum viable product”, the smallest thing that works. Aim a little higher: a **minimum lovable product**. It is small, focused and genuinely useful, so the first buyers actually love it and tell others.

- **Shorter is better.** A 25 to 45 page guide that gets a result beats a 200-page book nobody finishes.
- **One promise.** One audience, one problem, one outcome.
- **Quick win inside 10 minutes.** Give readers a small success early so they trust the rest.
- **Save “more” for version 2.** Customer feedback will tell you what to add.

The Outcome Map: build backwards

Write your Point B at the top. Then ask: “*What 5 to 8 milestones must someone pass to get there?*” Each milestone becomes a chapter or module. Order them as the person would experience them, from the very first action to the final result.

Example: a guide for first-time freelancers

#	Milestone (chapter)	What the reader gets
1	Choose a service people pay for	Offer worksheet
2	Define your ideal client	Client profile template
3	Build a simple portfolio fast	Portfolio checklist
4	Price without undercharging	Pricing calculator
5	Find clients (no cold-pitching all day)	10 copy-paste outreach scripts
6	Win the call and close	Call script and proposal template
7	Deliver and get referrals	Onboarding and review request templates

The anatomy of a great chapter

Give every chapter the same simple structure. It makes writing faster and reading easier.

Part	Purpose	Length
Hook	Why this step matters to the reader	2 – 3 sentences
Core idea	The one thing to understand	1 short section
Steps	Exactly how to do it	3 – 7 steps
Example	A real or realistic story that proves it works	1 example
Action	A worksheet, checklist or exercise	1 per chapter
Recap	Three bullet takeaways	3 bullets

Features that raise value

Content alone is a commodity. **Tools** make people feel they are getting more. Pick two or three from this list:

- Worksheets, checklists and fill-in templates
- Scripts and swipe files they can copy and paste

- A one-page quick-start summary
- Real examples and case studies
- A prompt pack, spreadsheet or Notion template as a bonus
- A 7- or 30-day action plan at the end

THE 1-2-3 BONUS RULE

Add **one** bonus that is fast to make but valuable to the buyer, such as a cheat sheet, a swipe file or a template. Name it for the benefit (“The 10-Minute Quick-Start Checklist”) and list it clearly on your sales page.

Name your product

A good name is clear before it is clever. Try these formulas:

Formula	Example
[Number]-Day [Result] Plan	7-Day Budget Reset
The [Audience] [Thing]	The Busy Mom Meal Planner
[Result] Without [Pain]	Freelance Clients Without Cold Pitching
The [Adjective] [Format]	The Simple Content Calendar Kit

Add a subtitle that states who it is for and what they get. Test your name by asking three people from your audience: “*What do you think this is?*” If they get it right, it works.

Your Product Blueprint

Fill in this one-page blueprint. It becomes your guiding document for Chapters 5, 6 and 7.

Blueprint item	Your answer
Working title and subtitle	
Target audience	
Promise (Point A to Point B)	
Format and length	
Chapters / modules (5 to 8)	
Worksheets and templates	
Bonus	
Tools I will use	
Finish-by date	

Plan your time

Creation takes six days in this program. Break your outline into daily chunks so the work feels light. A typical split for a 6-chapter guide:

Day	Task
15	Intro, chapter 1 and the quick-start page
16	Chapters 2 and 3
17	Chapters 4 and 5
18	Chapter 6, conclusion and worksheets
19	Edit and fact-check everything
20	Assemble the file, add bonuses, export

COMMON MISTAKES

Planning for 200 pages, adding every idea you ever had, skipping the outline “because I know what to write”, and mixing multiple audiences in one product. If you feel the urge to add one more chapter, write it on a “version 2” list instead.

DAY 11	Write your transformation and promise. Decide format and length.
DAY 12	Create the Outcome Map and the list of 5 to 8 chapters.
DAY 13	Outline every chapter using the hook, idea, steps, example, action and recap structure. Choose your bonus.
DAY 14	Finalize the Blueprint, choose your title and set your daily creation schedule.

☐	My promise is one clear sentence
☐	I have 5 to 8 chapters mapped from start to result
☐	Each chapter has an outline
☐	I chose 2 or 3 features plus one bonus
☐	I have a title, subtitle and a finish-by date

CHAPTER

05

Create It Fast

Use AI and simple tools to write, design and assemble your product efficiently.

DAYS 15 - 20

IN THIS CHAPTER YOU WILL

- + Set up a fast, low-friction creation workflow
- + Use AI to outline, draft and refine without losing your voice
- + Apply a repeatable editing checklist
- + Assemble a complete first version of your product

Your first draft will not be good, and it does not have to be. Your job this week is to get from the outline to a complete version. Polishing comes after, and speed is on your side.

The creator's mindset

- **Separate making from judging.** Write first. Edit later. Doing both at once is the biggest time-waster.
- **Work in short sprints.** Set a timer for 25 minutes, write, then break for 5. Three sprints a day is enough.
- **Aim for 70%.** A solid draft you can improve beats a perfect blank page.
- **Use your voice.** People buy your experience and perspective, not generic text.

Your lean tool stack

Job	Simple option	Tip
Write	Google Docs or Notion	One document per product
Think and draft	An AI assistant	Give it your Blueprint every time
Design	Canva	Use one brand kit
Images	Canva library, Unsplash, Pexels	Check each licence
Spreadsheets	Google Sheets	Share as a copy link
Templates	Notion or Canva	Use a “make a copy” link
Video / voice	Phone or Loom	Optional bonus
Final file	PDF export	Compress for easy download

The five-step AI workflow

AI is brilliant at structure, first drafts and variations. It is poor at lived experience, accuracy and taste. Use it the way an editor uses an intern: for speed, with you in charge.

- 1. Brief it.** Tell the AI who the audience is, the promise, the tone and the format.
- 2. Outline it.** Ask for chapter structure, then reorder it to match your Blueprint.
- 3. Draft it.** Generate one section at a time, not the whole book at once.
- 4. Make it yours.** Add your stories, examples, opinions and corrections.
- 5. Check it.** Verify facts, remove fluff and read every line aloud.

Start every session with a brief

PROMPT 1: THE CREATOR BRIEF

You are an expert [FIELD] writer and editor. I am creating a [FORMAT] called [TITLE] for [AUDIENCE]. Their main problem is [PROBLEM]. The promise is: [PROMISE]. Tone: friendly, clear, practical, no jargon. Use short paragraphs and simple examples. Confirm you understand, then wait for my next instruction.

PROMPT 2: CHAPTER DRAFT

Using the brief, write a first draft of Chapter [N]: [CHAPTER TITLE]. Structure: a 3-sentence hook, the core idea, 5 clear steps, one realistic example, one action exercise and a 3-bullet recap. About [600] words. Leave placeholders like [ADD MY STORY HERE] where my personal experience would make it stronger.

PROMPT 3: WORKSHEETS AND TEMPLATES

Create a fill-in worksheet for Chapter [N] that helps the reader [DO THE ACTION]. Include 6 to 8 questions, one example answer, and a short checklist at the end.

PROMPT 4: SIMPLIFY AND HUMANIZE

Rewrite the text below at an 8th-grade reading level. Shorten long sentences, remove clichés and filler words, keep my meaning, and keep a warm, direct tone. [PASTE TEXT]

PROMPT 5: GAPS AND OBJECTIONS

Act as a skeptical beginner reading this chapter. List 5 questions or doubts they might still have, and tell me what example or explanation would answer each one.

Rules for using AI responsibly

- **You are the expert in the room.** Replace generic statements with your own stories, numbers and opinions.

- **Fact-check everything.** AI can sound confident and be wrong, especially with statistics, laws and quotes.
- **Avoid risky claims.** Never promise medical, legal or financial outcomes you cannot back up.
- **Never copy others.** Do not paste other creators' work. Use original wording and ideas.
- **Check images and fonts.** Use assets you have the right to use commercially.
- **Know platform rules.** Some marketplaces have policies about AI-assisted content. Read yours.

Write faster: five techniques that work

- **Talk it out.** Record yourself explaining each chapter, then transcribe and tidy it.
- **Write the ugly version.** Type “this part is about X” and move on. Return later.
- **Use a template.** The same chapter structure every time removes decision fatigue.
- **Write the hardest chapter second,** after you have momentum, never first or last.
- **Stop mid-sentence.** End each day halfway through a thought so tomorrow starts easy.

Create your worksheets, checklists and bonus

These add real perceived value and are quick to make. For each chapter ask: “*What is one thing the reader should write, decide or tick?*” Make that the worksheet. Keep every one to a single page, and use the same layout each time.

The edit pass: your 10-point checklist

☐	Does the opening promise match what the product delivers?
☐	Does every chapter lead to an action, not just information?
☐	Did I remove repeated or off-topic paragraphs?
☐	Are all facts, links and prices correct and up to date?
☐	Are paragraphs short (3 to 4 lines) and headings clear?
☐	Did I replace vague words (“many”, “often”) with specifics?
☐	Did I add at least one personal story or example per chapter?
☐	Is the reading level simple, with no unexplained jargon?
☐	Did I read it aloud and fix awkward sentences?
☐	Does it end with next steps and a thank-you?

USE A FRESH PAIR OF EYES

Ask 2 or 3 people from your target audience to read one chapter and answer: “What was confusing? What was most useful? What is missing?”
Fix the top two issues. This is the fastest quality boost available.

Assemble the final product

1. Collect all chapters, worksheets and bonuses in one folder.
2. Build the full document in Canva or Docs using one consistent layout (Chapter 6 shows how).
3. Add a cover, title page, short “how to use this” note and table of contents.
4. Insert page numbers and clickable links where useful.
5. Export as a PDF at standard quality. Compress if the file is very large.
6. Open the PDF on a phone and a laptop. Fix anything that is cut off or tiny.

COMMON MISTAKES

Pasting AI text without editing, generating the entire product in one prompt, rewriting the same chapter ten times, and designing before the words are final. Finish the content first. Then design.

DAY 15	Set up your brief. Write the introduction, quick-start page and chapter 1.
DAY 16	Draft the next two chapters. Add your stories and examples.
DAY 17	Draft the next two chapters. Create the first worksheets.
DAY 18	Finish the last chapter, conclusion, remaining worksheets and the bonus.
DAY 19	Run the edit checklist. Get feedback on one chapter from a real reader.
DAY 20	Assemble the complete product and export your first full PDF.

☐	All chapters are drafted in my voice
☐	Worksheets and a bonus are created
☐	Facts and claims are verified
☐	The edit checklist is complete
☐	I have one full, exported version

CHAPTER

06

Make It Look Premium

Improve your product's design, formatting, visuals and overall perceived value.

DAYS 21 - 23

IN THIS CHAPTER YOU WILL

- + Understand why design changes how valuable your product feels
- + Apply six simple design pillars to every page
- + Create a cover and interior that look professionally made
- + Run a final premium-quality check

People judge a product within seconds, before they read a single word. The same content, wrapped in better design, feels like it is worth two or three times as much.

Perceived value is real value

Design does not replace good content, but it signals care, credibility and quality. A crowded layout says “amateur”. Clear typography, generous white space and a consistent look say “expert”. Because buyers cannot see inside your product before purchase, your cover, previews and sales page do the convincing.

Looks cheap	Looks premium
Five fonts and many colors	Two fonts, 2 or 3 brand colors
Wall-to-wall text	Short paragraphs with white space
Inconsistent headings	Consistent hierarchy on every page
Low-quality clip art	Clean icons and purposeful visuals
Plain cover with a title	Cover with a clear promise and strong design

The six pillars of premium design

1. Typography

Use **two fonts at most**: one for headings and one for body text. Body text should be 10 to 12 pt for print-style PDFs, with line spacing around 1.4 to 1.6. Make headings clearly larger and bolder than body so a reader can skim.

Style	Heading font	Body font
Modern, clean	Poppins or Montserrat	Inter or Open Sans
Elegant, editorial	Playfair Display	Lora or Source Serif
Friendly, approachable	Quicksand or Nunito	Nunito or Lato

2. Color

Choose **one primary color, one accent and neutrals**. Use the 60-30-10 rule: 60% neutral (background), 30% primary, 10% accent for highlights and calls to action. Pick colors that suit your audience: calm blues and greens for wellness and finance, warm tones for creativity and food, bold contrast for productivity.

3. White space

Empty space is not wasted space. Generous margins (at least 0.75 inch), spacing between sections and short paragraphs make text easier to read and feel more luxurious. When in doubt, remove something.

4. Consistency

Use the same heading styles, margins, icons, colors and page elements throughout. Create each element once (chapter opener, tip box, worksheet layout) and duplicate it. Consistency is the single fastest route to a professional look.

5. Hierarchy

Guide the eye. The most important thing on each page should be obvious: a big heading, a highlighted number, a boxed key idea. If everything is bold, nothing is.

6. Purposeful visuals

Every visual should help understanding or add emotion. Use clean icons, simple diagrams, tables, pull quotes and a handful of good photos. Avoid cluttered backgrounds that fight the text.

Design your cover

Your cover is your first and sometimes only impression. Aim for something that is clear at thumbnail size, because that is how it appears on Instagram and sales pages.

- **Big, readable title.** Readable even when the image is 150 pixels wide.
- **Subtitle with the promise.** What result does the reader get?
- **One strong focal point.** A bold color field, a simple graphic or a clean photo.
- **High contrast.** Light text on dark or the reverse. Never low contrast.
- **Your name or brand,** small and tidy at the bottom.

COVER TEST

Shrink your cover to the size of your thumb on a phone. Can you still read the title and understand the topic in two seconds? If not, simplify.

Design the inside

Create a small library of reusable elements and place them on every chapter:

Element	Use it for
Chapter opener page	Starts each chapter with number, title and a short promise
Callout boxes	Tips, examples, warnings, key takeaways
Checklists	Chapter wrap-ups and action lists
Worksheets with lines or fields	Exercises the reader completes
Pull quotes	Memorable ideas worth highlighting
Tables and simple diagrams	Comparisons and processes
Icons	Quick visual cues next to headings

Make it phone-friendly

A large share of your buyers will read on a phone. Test every page at that size.

- Use a portrait page size around 6 x 9 inches or A5, which reads well on a small screen.
- Keep body text at least 10 pt and avoid text in small, low-contrast boxes.
- Make tappable links obvious and keep tables to 3 or 4 columns.
- Add a clickable table of contents so readers can jump around.

Add premium extras

Small additions make buyers feel they got more than they paid for:

- A welcome page with a personal thank-you and how to use the product
- A one-page quick-start summary at the front
- A bonus pack with templates, checklists or scripts

- A clear next-steps page with how to reach you and where to leave a review
- Professional file names, for example “Budget-Reset-Planner-v1.pdf”
- Optional: a short video walkthrough or voice note

Create product mockups

Mockups show your product in a realistic setting: a tablet, a laptop or a stack of pages. They go on your sales page and Instagram posts and dramatically increase perceived value. Use Canva’s mockup tools or a free mockup generator, and show the cover plus two or three interior pages so buyers can see the quality.

The premium quality check

☐	Two fonts and a limited color palette are used throughout
☐	Every page has clear hierarchy and plenty of white space
☐	Headings, boxes and margins are consistent
☐	No pixelated images, typos or misaligned elements
☐	The cover is clear at thumbnail size
☐	The PDF looks good on a phone and on a laptop
☐	Links, bookmarks and the table of contents work
☐	A quick-start page, bonus and thank-you are included
☐	I compared my pages with a professionally designed product and closed the gaps

COMMON MISTAKES

Over-decorating, using too many fonts, choosing trendy colors that fight each other, placing text over busy photos, and rushing the final proofread. When something feels crowded, delete first and decorate second.

DAY 21	Define your brand kit: two fonts, three colors, one icon style. Apply it to a sample chapter.
DAY 22	Design the cover, chapter openers and reusable elements. Apply to the full document.
DAY 23	Add bonuses and extras, create mockups, test on phone and laptop, run the premium checklist, export the final PDF.

CHAPTER

07

Set Up Your Launch

Prepare your sales page, pricing, payment method, promotional content and launch strategy.

DAYS 24 – 27

IN THIS CHAPTER YOU WILL

- + Price your product with confidence
- + Choose a selling platform and a payment method that works for you
- + Write a sales page that answers every buyer question
- + Prepare your promotional content and launch schedule

A great product with a weak launch setup sells poorly. A clear price, a simple checkout and a persuasive page turn interested people into buyers.

Your launch asset list

☐	Final product file, tested and downloadable
☐	Price and launch offer decided
☐	Selling platform and payment method set up
☐	Sales page written and published
☐	Refund policy and basic legal pages ready
☐	Product mockups and cover images ready
☐	14-day content plan and launch posts drafted
☐	A test purchase completed successfully

How to price your product

Beginners almost always underprice. Low prices attract bargain-hunters, signal low quality and leave no room for promotion. Price against the **value of the result**, not the number of pages.

Three questions to anchor your price

1. **What is the problem costing them?** (money, time, stress)
2. **What do the alternatives cost?** (coaches, courses, doing nothing)

3. How much time or money does my product save?

Tier	Typical range*	Works for
Impulse buy	\$5 - \$17	Checklists, templates, small guides
Core product	\$19 - \$49	Full guides, template kits, prompt packs
Premium	\$50 - \$99+	Mini-courses, bundles, products with support

*Illustrative ranges only. Use competitor research from Chapter 2 and your own testing to choose.

Pricing tactics that help

- **Launch price:** offer a limited-time discount (for example 30% off for the first 72 hours). Be honest and do end it.
- **Anchor price:** show the regular price crossed out beside the launch price, only if the regular price is real.
- **Bundle:** product plus bonus at a slightly higher price increases average order value.
- **Order bump:** a small add-on at checkout (a template pack, for example) for a few dollars more.
- **Pre-sale buyers:** reward them with the lowest price and a thank-you bonus.

Choose your selling platform

You need three things: a way to take payment, automatic file delivery and a simple page to sell from. Dedicated creator platforms bundle all three.

Platform type	Examples	Good for
Creator storefronts	Gumroad, Payhip, Lemon Squeezy	Fast setup, automatic delivery
Link-in-bio stores	Stan Store, Beacons	Selling straight from Instagram
Marketplaces	Etsy (printables, templates)	Built-in search traffic
Your own site	Shopify, WordPress, Carrd + checkout	Full control, more setup

CHECK PAYMENT AVAILABILITY IN YOUR COUNTRY

Platforms and payout methods are not available everywhere, and fees and rules change. Before you choose, check on each platform's own pages: **Can I sign up from my country? How do I receive payouts (bank, PayPal, other)? What are the current fees? Which payment methods can my buyers use?** If one platform does not support your country, choose another or ask its support. You can also look at local payment options and add manual methods such as bank or mobile wallet transfer for buyers in your region.

The anatomy of a sales page that sells

Your sales page has one job: help the right person decide yes with confidence. Follow this order and you will cover every question a buyer has.

Section	What to include
1. Headline	The result you promise, for whom, without what obstacle
2. Subheadline	One sentence of how and the format
3. Problem	Describe their situation in their own words
4. Cost of staying stuck	What happens if nothing changes
5. Solution	Introduce your product as the bridge

Section	What to include
6. What's inside	Chapters, templates, bonuses with benefits
7. Who it's for / not for	Builds trust and filters wrong buyers
8. Proof	Testimonials, beta feedback, your story, results
9. Offer and price	Price, launch discount, bonus, deadline
10. Guarantee	Refund promise that removes risk
11. FAQ	Answer top objections: time, level, format, support
12. Final call to action	One clear button to buy

Headline formulas

- [Achieve result] in [timeframe] without [pain]
- The simple [format] that helps [audience] [result]
- Finally: a [thing] built for [specific person]
- Stop [bad habit]. Start [better outcome] with [product]

SAMPLE SALES PAGE OPENING

Headline: Know exactly what you can spend this week, even if your income changes every month.

Subheadline: The 7-Day Budget Reset: a simple planner and 25-page guide for freelancers.

Problem: You never know if this month is a good one or a bad one, so you either overspend or panic-save...

No testimonials yet? Here is how to earn them

- Give 5 to 10 beta readers free access in exchange for honest feedback and permission to quote them.
- Use specific results ("I finally know my number") rather than vague praise.
- Share your own story and why you built the product.
- Show previews and sample pages, so buyers can see the quality.

BE HONEST, ALWAYS

Never invent testimonials, fake scarcity or exaggerate results. Real proof, honest deadlines and clear promises build trust, and trust is your best long-term asset.

Remove risk: your guarantee and policies

A clear refund promise lifts confidence. Many digital sellers offer a short window (for example 7 or 14 days) for buyers who did the work and did not get value. Decide what you are comfortable with and say it plainly. Also prepare three simple pages: **Refund Policy, Terms of Use and Privacy Policy**. Platforms often provide templates. Because rules differ by country, consult a qualified professional if you are unsure about taxes, business registration or consumer law.

Test the whole buying journey

1. Buy your own product using a real payment (or the platform's test mode).
2. Confirm the confirmation email arrives and the download link works.
3. Open the file on your phone and your computer.
4. Ask one friend to buy it from the link and report any confusion.
5. Fix everything before you announce a single thing.

Prepare your promotional content

Content is how people discover you and decide they trust you. Plan your 14-day content mix around five pillars so you never run out of ideas:

Pillar	Purpose	Post ideas
Problem	Make them feel understood	"If you struggle with X, read this"
Teach	Show you know your stuff	3 tips, mini-lessons, myths vs facts
Story	Build connection	Why I made this, my own journey
Proof	Build belief	Beta feedback, before/after, behind-the-scenes
Offer	Invite action	What's inside, launch price, deadline

Your mini launch calendar

When	Content goal
Days 24 – 25	Tease the problem, hint at the solution, tell your story
Day 26	Reveal the product name, show mockups, start the waitlist push
Day 27	Share beta feedback, answer FAQs, announce the launch date
Day 28	Launch day: open the doors with the launch price
Day 29	Proof, objections and behind-the-scenes
Day 30	Last call: the deadline for the launch price

Start an email list (even a tiny one)

Instagram can change reach overnight. Email is yours. Offer a small free bonus, such as a sample chapter or a one-page checklist, in exchange for an email address. Even 25 subscribers on launch day can produce your first sales, because they asked to hear from you.

COMMON MISTAKES

Pricing too low out of fear, writing the sales page around features instead of benefits, hiding the price, using too many buttons and links, and skipping the test purchase. A confused buyer does not buy.

DAY 24	Decide price, launch offer and guarantee. Set up your selling platform and payment method.
DAY 25	Upload the product, write the sales page using the 12-part structure and add mockups.
DAY 26	Create policies pages, set up your email capture and run a complete test purchase.
DAY 27	Plan and draft your 7-day content: posts, reels, Stories and captions. Update your Instagram bio and link.

CHAPTER

08

Launch & Get Your First Buyers

Promote your product through Instagram, build interest, handle objections and make your first sales.

DAYS 28 - 30

IN THIS CHAPTER YOU WILL

- + Prepare your Instagram profile to convert visitors into buyers
- + Run a simple three-day launch with posts, Stories and DMs
- + Answer objections without pressure
- + Track your results and keep improving after the first sales

Your first buyers will not come from an algorithm miracle. They will come from clear messages, honest conversations and consistent follow-up. This chapter is where it all comes together.

The first-10-buyers mindset

Selling your first ten copies is mostly a **conversation** problem, not a marketing-tools problem. Be visible, be helpful and make it easy to say yes. Do not apologize for selling: if your product helps, withholding the invitation is the unkind choice.

Set up Instagram to convert

Element	What to do
Name field	Include your niche keyword (for example “Sara Budgeting for Freelancers”)
Bio	Who you help, the result, the call to action
Link	One link to your sales page or link-in-bio store
Profile photo	Clear, friendly, high contrast
Highlights	“Start here”, “Product”, “Results”, “FAQ”
Pinned posts	Your best problem post, your story and your offer

BIO FORMULA

I help [WHO] [GET RESULT]
[Proof or credibility in one line]
Free [bonus] + [PRODUCT NAME] below

Content that sells without feeling salesy

Use a blend of formats. Reels reach new people, carousels teach and build trust, Stories convert warm followers, and DMs close the sale.

Format	Job	Idea
Reels	Reach new people	Hook, one useful tip, call to action
Carousels	Teach and build trust	5 to 8 slides: myth, fix, steps, offer
Stories	Convert followers	Polls, questions, countdown, link sticker
Lives / voice notes	Answer live	"Ask me anything" about the topic
DMs	Close the sale	Personal replies and follow-ups

Hooks that stop the scroll

- "If you [struggle with X], this is for you."
- "Stop doing [common mistake]. Do this instead."
- "I helped [person] get [result] in [time]. Here's how."
- "3 mistakes that keep [audience] stuck."
- "What I wish I knew before [problem]."

Use a comment keyword

End a post with: "Comment *GUIDE* and I'll send you the link." Then reply to every comment and send a friendly DM. This lifts engagement, signals the algorithm and starts conversations with real buyers.

Your three-day launch

Day 28: open the doors

- Post a Reel or carousel announcing the product, who it is for and the result.
- Share a 6 to 8 slide Story sequence (below).
- Message your waitlist, interviewees and pre-sale people personally.
- Reply to every comment and DM within the hour if you can.

LAUNCH-DAY STORY SEQUENCE

1. Problem question: "Ever felt [problem]?"
2. Story: why I created this
3. Reveal: here it is (mockup)
4. What's inside (3 benefits)
5. Proof or sneak peek
6. Launch price + deadline
7. Link sticker: "Get it here"
8. Poll: "Questions? Ask me"

Day 29: build belief

- Share feedback from beta readers (with permission).
- Post an FAQ Story answering the top three objections.
- Show a behind-the-scenes look at how you made it.
- Follow up with everyone who clicked or replied but did not buy.

Day 30: last call

- Remind people the launch price ends today, and give a precise time.
- Post an honest "last chance" Reel or Story with a countdown sticker.
- Send one final, friendly DM to people who showed interest.
- When time is up, **end the offer as promised**. Your word builds long-term trust.

Selling in the DMs

A friendly conversation outsells a pushy pitch. Follow a simple flow: **greet, ask, listen, suggest, invite.**

WARM DM SCRIPT

You: Hey [Name]! Thanks for commenting. What's your biggest struggle with [topic] right now?

Them: [Answer]

You: That makes total sense, that's exactly why I made [PRODUCT]. It gives you [specific help for their answer]. Want me to send you the link?

Them: Yes

You: Here you go: [LINK]. I'd love to hear what you think once you start!

Handling objections

Objections are not rejections. They are questions in disguise. Reply with empathy first, then clarity, never pressure.

Objection	What they really mean	Helpful response
"It's too expensive."	I'm not sure it's worth it	Compare it to the cost of the problem; mention the guarantee and what they get
"I'll think about it."	I have a question I haven't asked	"Of course. What would help you decide?" and remind them of the deadline once
"I can find this free online."	Will this save me time?	Free info is scattered. This is a step-by-step system with templates, ready to use
"Will it work for me?"	I'm afraid it won't	Share who it is for, a beta result and the refund promise
"I don't have time."	This feels like work	Highlight the quick start and daily time needed (for example 15 minutes)
"I'm not ready."	I'm scared to start	Remind them the product is for beginners and that starting small is the point

Ways to reach more people

- **Collaborate** with creators in a related niche for a shout-out, a live or a giveaway.
- **Send free copies** to a few micro-influencers or happy beta readers in exchange for honest feedback.
- **Answer questions in communities** where your audience gathers. Be genuinely helpful, follow each group's rules and never spam.
- **Repost buyer feedback** in Stories and tag the buyer with permission.
- **Reuse content:** turn one tip into a Reel, a carousel, a Story and a caption.

Know your numbers

Track a few simple metrics every day of the launch. The simplest funnel: **views, profile visits, link clicks, purchases.**

Metric	What it tells you
Views / reach	Is your content being seen?
Profile visits	Does your hook make people curious?
Link clicks	Is your bio and call to action clear?
Sales page visitors to buyers	Does your page and offer convince?

ILLUSTRATION ONLY

Suppose 500 people visit your sales page and 2% to 4% buy. That would be roughly 10 to 20 sales. Your own conversion rates will vary widely. The point is to know your numbers so you can fix the weakest step.

Troubleshooting guide

Problem	Likely cause	Fix
Few views	Weak hooks or low posting	Test new hooks, post consistently, use Reels
Views but few clicks	Unclear call to action	Add comment keyword, clearer bio and link sticker
Clicks but no sales	Sales page or price issue	Improve headline, add proof, clarify offer, check the checkout
Sales then refunds	Mismatch with expectations	Make the promise and contents clearer

After your first sales

1. **Thank every buyer** personally and ask for a short review or message.

2. **Collect testimonials** with permission and add them to your sales page.
3. **Ask what was most useful and what was missing.** This is your roadmap.
4. **Update the product** to version 1.1 using real feedback.
5. **Plan the next step:** a bonus pack, an advanced version, a bundle or a mini-course.

COMMON MISTAKES

Going silent after one post, hiding the product link, ignoring comments and DMs, giving up after day three, and never following up. Most buyers need to see an offer several times before they act.

DAY 28	Launch day: announce, post Stories, message your warm list, answer every comment and DM.
DAY 29	Share proof and FAQs, handle objections, follow up personally.
DAY 30	Last call: reminder posts, final DMs, end the offer as promised. Review your numbers and collect feedback.

☐	My Instagram profile is optimized with a clear link
☐	I posted at least one launch post and a Story sequence
☐	I messaged my waitlist and warm contacts
☐	I answered every comment and DM
☐	I followed up with interested people
☐	I recorded my numbers and feedback

You Did It

Thirty days ago you had a possibility. Now you have a product, a page, a plan and the experience of putting your work in front of real people. That experience is worth more than the first sale. Thank you for trusting this plan.

What you have built

- A problem worth solving, validated with real people
- A clear niche and customer profile
- A finished product that looks premium
- A sales system you can reuse

Your next 60 days

Days	Focus
31 - 40	Gather feedback and testimonials. Release version 1.1. Keep posting daily.
41 - 50	Add a bonus, a bundle or a lower-priced entry product. Grow your email list.
51 - 60	Collaborate with other creators. Try a small ad test only after your organic message works.
61 - 90	Build product number two, based on what buyers asked for.

“The goal of the first product is not to get rich. It is to prove you can do it.”

30-Day Tracker

Tick each day as you complete it. Small wins add up.

☐ Day 1	Collect 30 problems	☐ Day 16	Draft chapters
☐ Day 2	Skills and interests inventory	☐ Day 17	Draft chapters and worksheets
☐ Day 3	Score ideas and choose a winner	☐ Day 18	Finish draft and bonus
☐ Day 4	Write your niche statement	☐ Day 19	Edit and get feedback
☐ Day 5	Customer profile and phrases	☐ Day 20	Assemble and export
☐ Day 6	Competitors and positioning	☐ Day 21	Brand kit
☐ Day 7	Market check and outreach	☐ Day 22	Cover and reusable elements
☐ Day 8	Hold conversations	☐ Day 23	Extras, mockups, final check
☐ Day 9	Poll and waitlist	☐ Day 24	Price and platform setup
☐ Day 10	Pre-sale and decision	☐ Day 25	Upload and sales page
☐ Day 11	Promise and format	☐ Day 26	Policies, email, test purchase
☐ Day 12	Outcome Map	☐ Day 27	Plan and draft promo content
☐ Day 13	Chapter outlines and bonus	☐ Day 28	Launch day
☐ Day 14	Blueprint and schedule	☐ Day 29	Proof and objections
☐ Day 15	Brief, intro, chapter 1	☐ Day 30	Last call and review

YOUR REWARD

On day 30, write down three things you learned and one thing you will do differently on your next launch. Then celebrate. You finished what most people never start.

Your first sale starts **today.**

*Find it. Validate it. Build it.
Launch it. Sell it.*
