

A practical guide for beginners

AI Side Hustle Starter Kit

2026

Ten realistic ways to earn extra income with AI tools: the costs, skills, workflows, a 30-day plan and 50 prompts to get moving.

Tools | Skills | Workflows | 30-day plan | Prompts

9 50 useful prompts 22

Before you start. Nothing here is a promise of income. Results depend on your effort, your market and the quality of your work. Prices, plans and platform rules change often, so check each tool's current pricing and each marketplace's AI-content policy before you spend money or publish. Cost figures in this book are rough ranges, not quotes.

How to use this book

AI does not give you a business. It gives you speed. The people who earn from it are the ones who pair that speed with a clear service, a narrow audience and honest, checked work.

Every hustle in this book follows the same pattern: *you* choose the client, the goal and the standard. The AI produces first drafts, variations and busywork. You review, correct and deliver. Clients pay for the result and your judgment, not for the tool.

Pick one hustle. Not three. Work through the 30-day plan in Chapter 7, and use the prompt library in Chapter 9 as your daily toolkit. When a prompt has square brackets, replace the bracketed words with your own details.

Three rules that apply everywhere

1. Check every fact, number and claim the AI gives you before a client sees it.
2. Never paste a client's private or confidential data into a tool unless you understand its data policy and have permission.
3. Be honest about using AI if a client, platform or contract asks. Many clients do not mind. Hiding it when asked is what causes trouble.

Chapter 1

10 realistic AI-assisted side hustles

These are chosen because they sell to real buyers today, need little money to start, and get measurably faster with AI. None is passive. All of them are work you can do in a few hours a week.

1 Content writing and repurposing

Turn one long piece (a podcast, webinar or blog post) into a week of posts, a newsletter and short summaries. Or write blog posts and product descriptions with AI-drafted outlines and your own editing.

Why it works: small businesses and creators have content but no time to reuse it.

Beginner | \$0 to \$30 a month | Offer: monthly content package

2 Social media packages for local businesses

Plan, write and design a month of posts for a cafe, gym, salon or clinic. AI drafts captions and ideas; you add local detail, check brand fit and schedule the posts.

Why it works: local owners know they should post and rarely do.

Beginner | \$15 to \$40 a month | Offer: 12 to 20 posts a month

3 FAQ chatbot and support setup

Build a simple website chatbot or auto-reply system for a small business using its own FAQs, policies and opening hours. You handle setup, testing and a short handover guide.

Why it works: owners lose hours answering the same ten questions.

Intermediate | \$20 to \$60 a month | Offer: setup fee plus monthly upkeep

4 Workflow automation consulting

Connect tools so repetitive tasks run alone: new form entry to spreadsheet to email reply, invoice reminders, lead tracking, meeting notes to task list. AI handles the text steps in the middle.

Why it works: saved hours are easy to explain and easy to value.

Intermediate | \$0 to \$50 a month | Offer: fixed-price project

5 Digital products and templates

Create planners, spreadsheets, Notion templates, worksheets, checklists or prompt packs for one narrow audience (for example, wedding planners or new freelancers) and sell them on Etsy, Gumroad or your own page.

Why it works: make once, sell many times. The catch: it is crowded, so a narrow niche and real usefulness matter.

Beginner to intermediate | \$0 to \$50 a month | Offer: \$5 to \$40 products

6 Short-form video editing and faceless channels

Edit raw footage into captioned short videos for creators and small brands, or run a faceless channel in a niche you know, using AI for scripts, captions and voice. Editing for clients is the faster route to income.

Why it works: demand for short video far exceeds the supply of people who will edit it consistently.

Intermediate | \$20 to \$60 a month | Offer: per video or monthly bundle

7 Resume, LinkedIn and cover letter service

Rewrite resumes and LinkedIn profiles for job seekers in one field (nursing, IT support, early-career graduates). AI drafts bullet points; you interview the client to get real achievements.

Why it works: clear, personal stakes and a simple price point.

Beginner | \$0 to \$25 a month | Offer: flat package per client

8 Transcription, translation and localization

Clean up AI transcripts of interviews, meetings and videos, or translate and adapt content between languages you actually speak well. AI does the first pass; your fluency catches tone and mistakes.

Why it works: raw machine output is rarely client-ready, and people pay for the polish. Bilingual speakers have a real edge.

Beginner to intermediate | \$0 to \$40 a month | Offer: per word, minute or project

9 Brand kits, thumbnails and presentation design

Create simple logos, colour and font sets, YouTube thumbnails, social templates or slide decks. AI image tools generate ideas and elements; Canva or similar tools finish the layout.

Why it works: new businesses want to look professional cheaply. Check each image tool's licence terms for commercial use.

Beginner to intermediate | \$15 to \$40 a month | Offer: fixed-price kits

10 Niche research and curated newsletter

Track one industry (local property, ecommerce tools, agricultural prices, healthcare regulation) and sell a weekly digest or custom research summaries. AI speeds up reading and summarizing; you provide the selection and analysis.

Why it works: busy professionals pay for filtered, trustworthy information. It takes the longest to build an audience.

Intermediate | \$0 to \$40 a month | Offer: subscription or reports

How to choose. Pick the hustle where you already have two of these three: knowledge of an industry, a skill clients recognise, or access to people who might buy. Chapter 3 helps you match your level to a starting point.

Chapter 2

Tools required

You do not need every tool on this list. You need one AI assistant, one place to make the final product, and one way to get paid.

The core stack, for almost any hustle

- **An AI assistant** such as Claude, ChatGPT or Gemini for drafting, brainstorming, editing and analysis. Start with a free tier and upgrade only when limits slow paid work.
- **A document and spreadsheet app** (Google Docs and Sheets, or Microsoft Office) for deliverables and tracking.
- **Canva or a similar design tool** for graphics, simple branding and presentations.
- **A payment method** such as PayPal, Wise, Stripe, a local bank or mobile payment option that works in your country and your clients' countries.
- **A simple portfolio page** on Notion, Google Sites, Carrd or a similar free builder.

Tools by hustle

Hustle	Main tools	Nice to have
1. Content writing	AI assistant, Google Docs	Grammar checker, Notion for planning
2. Social media packages	AI assistant, Canva, a scheduler (Buffer, Meta Business Suite)	Image generator for backgrounds
3. Chatbot setup	AI assistant, a no-code chatbot builder	Zapier or Make for hand-offs to email
4. Automation consulting	Zapier or Make, AI assistant, Google Sheets	Airtable, Notion, screen recorder for handover videos
5. Digital products	AI assistant, Canva, Notion or Sheets	Etsy or Gumroad account, mockup tool
6. Video editing	CapCut or similar editor, AI captioning	AI voice tool, Descript
7. Resume service	AI assistant, Google Docs or Word, PDF export	Resume templates, job-posting analysis prompts
8. Transcription and translation	AI transcription tool, AI assistant, a good text editor	Glossary spreadsheet per client
9. Brand and design	Canva, AI image generator, AI assistant	Font and palette tools, mockup generator
10. Research newsletter	AI assistant, a search tool with sources, Substack or Beehiiv	RSS reader, citation tracker

Rule of thumb. Learn one tool well before adding another. A client cares that the video is captioned correctly, not which of four editors you used.

Chapter 3

Skill level

Skill here means what you need to deliver paid work you are not embarrassed by, not what you need to feel confident.

Hustle	Level	What you actually need	To first sample
1. Content writing	Beginner	Clear writing and a good editing eye	2 to 4 days
2. Social media packages	Beginner	Basic Canva and knowledge of one platform	3 to 5 days
3. Chatbot setup	Intermediate	Comfort with no-code tools and testing	1 to 2 weeks
4. Automation consulting	Intermediate	Logical thinking, patience with troubleshooting	1 to 3 weeks
5. Digital products	Beginner to intermediate	Taste, plus real knowledge of your niche	1 to 2 weeks
6. Video editing	Intermediate	Pacing, captioning, audio basics	1 to 2 weeks
7. Resume service	Beginner	Interviewing and concise writing	2 to 3 days
8. Transcription / translation	Beginner to intermediate	Strong fluency in at least two languages	2 to 4 days
9. Brand and design	Beginner to intermediate	Visual sense and consistency	1 week
10. Research newsletter	Intermediate	Subject depth, source checking, consistency	1 to 2 weeks

If you are brand new

Start with hustle 1, 2, 7 or 8. They have the shortest path from zero to a sample you can show, and the work itself teaches you the AI skills you will reuse later.

If you already have a job skill

Apply AI inside your existing profession first. An accountant offering AI-assisted bookkeeping summaries, or a teacher selling lesson-plan packs, beats a generalist because trust is already built. Hustles 4, 5 and 10 reward this most.

The skill nobody lists

Reviewing. The best AI-assisted workers are fast, skeptical editors. They spot the invented statistic, the awkward phrase and the wrong tone in seconds. Practice that, not just prompting.

Chapter 4

Startup cost

You can start most of these for close to zero. Pay for a tool only when a paying client has made its limits painful.

Hustle	Free start?	Monthly tools	One-off costs
1. Content writing	Yes	\$0 to \$30	None
2. Social media packages	Mostly	\$15 to \$40	Optional paid design plan
3. Chatbot setup	Limited	\$20 to \$60	Domain for demo site, if wanted
4. Automation consulting	Mostly	\$0 to \$50	Paid automation plan for testing
5. Digital products	Yes	\$0 to \$50	Marketplace listing fees
6. Video editing	Mostly	\$20 to \$60	Decent headphones, storage

Hustle	Free start?	Monthly tools	One-off costs
7. Resume service	Yes	\$0 to \$25	Portfolio page
8. Transcription / translation	Mostly	\$0 to \$40	None
9. Brand and design	Mostly	\$15 to \$40	Font licences if needed
10. Research newsletter	Yes	\$0 to \$40	Optional custom domain

A sensible spending order

- **Month 1:** free tiers only. Build samples and send outreach.
- **After the first paid job:** upgrade the one tool that costs you the most time.
- **After three or more clients:** consider a paid scheduler, invoicing tool or project tracker.

Costs people forget

- **Payment fees and currency conversion.** They can take a visible slice of small jobs.
- **Taxes.** Side income is usually taxable. Learn your local rules and set some aside from the first payment.
- **Your time.** If a \$50 job takes 10 hours, your pay is \$5 an hour. Track time on your first five jobs and adjust prices.

Skip these. Paid courses promising fast riches, “done-for-you” income systems and expensive mastermind groups. Everything you need to start is in this book and in free tool tutorials.

Chapter 5

How to find customers

Your first clients will come from direct conversation, not from ads or a perfect website. Aim for ten genuine outreach messages a day for two weeks.

The simple customer-finding loop

1	Choose a narrow audience. “Dentists in my city” beats “small businesses”.
2	Build one sample that solves a visible problem, such as a free week of posts for one business or a rewritten resume bullet list.
3	Message people directly with one specific observation and one clear offer.
4	Follow up once after three to four days. Most replies come from the follow-up.
5	Ask for a testimonial and a referral after each delivered job.

Where to look, by hustle

Hustle	Best first places	First offer idea
1. Content writing	LinkedIn, creator newsletters, niche communities	Turn one of their posts or episodes into 5 pieces, free
2. Social media	Walk-ins, Instagram and Facebook business pages, local groups	A free 5-post preview in their brand style
3. Chatbot setup	Owners with repeated questions in comments and reviews	A demo bot trained on their public FAQ
4. Automation	Small agencies, clinics, coaches, freelancers	A free “time-leak” audit, then a fixed-price fix
5. Digital products	Etsy, Gumroad, Pinterest, niche communities	A free mini-template to build an email list

Hustle	Best first places	First offer idea
6. Video editing	Creators with long videos and few shorts, DMs	Re-edit one of their clips as a short
7. Resume service	University groups, career communities, local job-seeker groups	A free review of one resume section
8. Transcription / translation	Podcasters, researchers, local exporters, marketplaces	A free 2-minute sample cleanup
9. Brand and design	New business announcements, Instagram, startup groups	A free mini brand sheet or thumbnail concept
10. Newsletter	LinkedIn, industry forums, professional associations	A free sample issue sent to 20 target readers

A cold message that gets replies

Hi [Name], I noticed [specific thing about their business]. I made a quick [sample] showing how [benefit]. Want me to send it over? No obligation. If it's useful, I take on a few [type] clients each month.

Short, specific and low-pressure. Never send the same message to everyone. Change at least the first sentence.

Freelance marketplaces

Upwork, Fiverr and similar sites can work for a first review or two, but they are crowded and pricing is often pushed down. Use them to collect early testimonials, then move toward direct clients.

Pricing your first jobs

- Price by outcome (a package) rather than by hour whenever you can.
- Start low enough to win the first two jobs, then raise the price every two or three new clients.
- Take a deposit, commonly half, before starting work.
- Write a one-page scope: what is included, how many revisions, deadline and price.

Chapter 6

Example workflows

A workflow is the repeatable path from client request to delivered work. Write yours down once and it becomes your quality standard.

1 Content repurposing

- | | |
|---|---|
| 1 | Get the source (transcript, video or article) and the client's audience and tone notes. |
| 2 | Ask AI for the main ideas, quotes and a list of possible posts. |
| 3 | Draft five posts, one newsletter and three short captions from the best ideas. |
| 4 | Edit every draft by hand for voice, accuracy and removal of filler. |
| 5 | Send in one shared doc with a one-line note on how to approve or request changes. |

2 Monthly social media package

- | | |
|---|--|
| 1 | Hold a 20-minute intake call: offers, audience, tone, dates and photos they can share. |
| 2 | Build a content calendar with AI, mixing education, proof, behind-the-scenes and offers. |
| 3 | Draft captions, then rewrite with local detail and the owner's phrasing. |
| 4 | Design graphics in Canva using a locked brand template. |
| 5 | Send for approval, schedule posts, and report results in a one-page summary. |

3 FAQ chatbot setup

- 1 Collect the real questions from emails, DMs, calls and reviews.
- 2 Write approved answers with the owner. Do not let the bot guess prices or policies.
- 3 Load the answers into your no-code bot and set a clear fallback: "Let me connect you with the team."
- 4 Test with 30 tricky questions, including rude and off-topic ones. Fix the weak answers.
- 5 Install it, record a short handover video, and review chat logs together after two weeks.

4 Automation project

- 1 Map the current process on paper: trigger, steps, who does what, where errors happen.
- 2 Pick one repetitive path to automate first. Smaller is safer.
- 3 Build it in Zapier or Make, using AI only for text tasks such as summarizing or drafting replies.
- 4 Test with dummy data, add error alerts, and keep a human approval step for anything customer-facing.
- 5 Document how it works and how to switch it off. Offer a small monthly support plan.

5 Digital product

- 1 Find three complaints or requests in your target audience's communities.
- 2 Outline the product so it solves one problem in under an hour of use.
- 3 Draft contents with AI, then fill and test it yourself with a realistic example.
- 4 Design the cover and preview images, and write a clear listing with honest benefits.
- 5 Publish, collect feedback from the first ten buyers, and release an improved version.

6 Short-video editing

- 1 Receive raw footage and the client's style references.
- 2 Auto-transcribe, then ask AI to flag the three to five strongest moments.
- 3 Cut each moment tightly, add captions, and fix every caption error by hand.
- 4 Add music or branding that the client has the rights to use.
- 5 Export in platform sizes, with a suggested caption and title for each clip.

7 Resume rewrite

- 1 Collect the current resume, target job posting and a short achievements questionnaire.
- 2 Hold a 30-minute call to pull out numbers, scope and results the client forgot.
- 3 Draft bullets with AI using the target keywords, then rewrite them in plain, true language.
- 4 Check every claim with the client. Never invent a title, date or result.
- 5 Deliver in Word and PDF, plus a matching LinkedIn headline and summary.

8 Transcript cleanup and translation

- 1 Run the audio through an AI transcription tool.
- 2 Build a glossary of names, brands and technical terms with the client.
- 3 Use AI to fix punctuation and, if needed, produce a first-pass translation.
- 4 Read the full text against the audio or source, correcting meaning, names and tone.
- 5 Deliver with a list of any unclear passages you flagged.

9

Mini brand kit

- 1 Collect a brief: audience, three adjectives, competitors they like and dislike.
- 2 Generate mood ideas and name or tagline options with AI.
- 3 Build a logo mark, two colours, two fonts and three templates in Canva.
- 4 Present two clear directions, not ten. Let the client choose and refine.
- 5 Deliver files in common formats with a one-page style guide and a licence note.

10

Weekly niche newsletter

- 1 Gather 20 to 30 sources and updates into one document each week.
- 2 Ask AI to summarize each item and rank by relevance to your reader.
- 3 Verify the top items against the original sources and add your own analysis.
- 4 Write the issue: three key items, one takeaway, one “what to do this week”.
- 5 Send on the same day and time, and track opens and replies to learn what readers want.

Chapter 7

30-day action plan

The goal is not a finished business in 30 days. It is a chosen niche, three samples, fifty conversations and, ideally, a first paid client.

Week 1: Choose and set up	
Day 1	Read this book. Shortlist three hustles that fit your skills and contacts.
Day 2	Research each shortlisted hustle: look at 10 real sellers or competitors and their prices.
Day 3	Choose one hustle and one narrow audience. Write your offer in one sentence.
Day 4	Set up your free tool stack: AI assistant, design tool, document folders.
Day 5	Complete one free tutorial for your main tool. Do not binge more than one.
Day 6	Create a folder of prompts and a simple client tracker in Google Sheets.
Day 7	Rest and review. Adjust your niche if it still feels vague.
Week 2: Build samples	
Day 8	Write your standard workflow from Chapter 6 in your own words.
Day 9	Make sample 1 for a real or realistic client.
Day 10	Review sample 1 critically. Fix errors, tone and anything that sounds generic.
Day 11	Make sample 2, faster than the first. Note what you learned.
Day 12	Make sample 3 in a different style or sub-niche.
Day 13	Build a one-page portfolio with your three samples and a short intro.
Day 14	Ask two friends or contacts for honest feedback on your samples.

Week 3: Reach out

Day 15	Build a list of 50 target prospects with a contact method for each.
Day 16	Write your outreach message and a follow-up. Customize the first line for each person.
Day 17	Send 10 messages.
Day 18	Send 10 more. Reply quickly to anyone who answers.
Day 19	Send 10 more. Join two communities where your audience hangs out and help without selling.
Day 20	Send follow-ups to the first batch.
Day 21	Review replies. Change the offer or wording if fewer than 1 in 15 respond.

Week 4: Deliver and improve

Day 22	Hold discovery calls. Ask what is painful, what they have tried and what a good result looks like.
Day 23	Send a one-page proposal with scope, price, timeline and revision limit.
Day 24	Start your first paid or discounted pilot job. Take a deposit if possible.
Day 25	Deliver a first draft early. Check every fact before sending.
Day 26	Handle feedback calmly and revise within the agreed limit.
Day 27	Deliver, invoice and ask for a testimonial and one referral.
Day 28	Record your time and earnings. Calculate your real hourly rate.
Day 29	Update your portfolio, raise your price slightly and refine your workflow.
Day 30	Plan the next 30 days: a weekly outreach target and a monthly income goal.

If you only have 30 minutes a day. Stretch each week into two. Consistency matters more than speed. Do not skip Week 3 outreach, because most beginners stall there.

Chapter 8

Beginner mistakes

Most failed side hustles do not fail for lack of tools. They fail from these ten habits.

1 Starting three hustles at once

Splitting your attention means no portfolio, no momentum and no results. Choose one for 90 days.

2 Choosing a market that is too broad

“I help businesses with AI” gets ignored. “I turn dental clinic FAQs into a website chatbot” gets a reply.

3 Delivering raw AI output

Clients can spot generic text, odd phrasing and fake-sounding enthusiasm. Always edit, localize and add your own judgment.

4 Trusting facts without checking

AI can state wrong numbers, names, dates, laws and sources with total confidence. One bad claim can end a client relationship. Verify anything that matters.

5 Sharing confidential information carelessly

Do not paste private client data, passwords, customer lists or unreleased material into a tool without permission and a clear understanding of its data handling.

6 Ignoring platform and copyright rules

Marketplaces, social platforms and image tools have rules about AI content, licensing and disclosure. Read them. Never copy another creator's work, brand or style too closely.

7 Underpricing and working without a scope

Very low prices attract difficult clients, and unclear scope leads to endless revisions. Use a short agreement, set a revision limit and take a deposit.

8 Waiting until everything is perfect

Your first samples will be imperfect. Send them anyway, learn from replies and improve. Ten conversations teach more than ten more hours of tutorials.

9

Buying tools and courses before earning

Subscriptions and “secret systems” feel like progress without being progress. Spend only to remove a real bottleneck in paid work.

10

Not tracking time, money and results

If you do not know which jobs pay well per hour, you cannot improve. Keep a simple sheet: client, hours, price, tool costs and what you would change next time.

Quick quality check before you send anything. Is every fact verified? Does it sound like the client, not like a robot? Does it follow the scope? Would I be comfortable if the client knew exactly how it was made?

Chapter 9

50 useful prompts

Copy a prompt, replace the [brackets] with your details, and run it in your AI assistant. Then edit the result. The first answer is a draft, not a deliverable.

How to get better results from any prompt. Give the AI a role, the audience, the goal, the format you want, and an example of good output. Ask it to list assumptions and questions before it answers. Then follow up: “make it shorter”, “make it more specific”, “what is missing?”

Finding and choosing your hustle (prompts 1 to 8)

PROMPT 1

Act as a business coach. I have these skills: [skills], [hours] hours a week, and a budget of [amount]. Suggest 5 AI-assisted side hustles that fit, and rank them by how fast I could get a first paying client.

PROMPT 2

Compare these three hustles for me: [hustle A], [hustle B], [hustle C]. Use a table covering startup cost, skill needed, time to first income, competition and risks.

PROMPT 3

I want to serve [audience]. List their 10 most common frustrations that a [service] could solve. Mark which are urgent enough that they would pay to fix.

PROMPT 4

Help me narrow my niche. My experience is [background]. Suggest 10 specific audiences I could serve, and explain why each might pay for [service].

PROMPT 5

Write a one-sentence offer using this format: “I help [audience] get [result] by [method], without [pain].” Give me 5 versions for [service].

PROMPT 6

Analyze these 5 competitor listings: [paste text]. Identify what they promise, how they price, what is missing, and how I could stand out.

PROMPT 7

Create a simple risk check for the hustle “[hustle]”. List legal, platform, data privacy and reputation risks, and how to reduce each one.

PROMPT 8

Based on my goal of earning [amount] a month, calculate how many clients or sales I need at [price], and what weekly activity would be realistic.

Finding customers (prompts 9 to 18)

PROMPT 9

Build a list of 20 types of businesses or people in [city or niche] who might buy [service]. For each, explain the problem they probably have.

PROMPT 10

Write a short cold message to a [type of business] owner. Mention one specific observation, offer [free sample], and keep it under 80 words. Give 3 versions with different tones.

PROMPT 11

Write a polite follow-up message to send 4 days after my first outreach to [prospect type]. Keep it short and add one new useful point.

PROMPT 12

Create a LinkedIn headline and “About” section for me as a [service] provider for [audience]. Avoid buzzwords. Be specific about results.

PROMPT 13

Suggest 10 free sample projects I could create to attract clients for [service]. Each should take under 2 hours and show clear value.

PROMPT 14

Write a discovery call script for [service]. Include 10 questions that uncover goals, budget, past attempts and decision-makers.

PROMPT 15

Draft a one-page proposal for [client type] including the problem, my solution, scope, price of [price], timeline, revision limit and next step.

PROMPT 16

Write 5 social posts that show my expertise in [niche] without selling directly. Include one story, one tip, one myth, one checklist and one question.

PROMPT 17

Create a short testimonial request message I can send after finishing a job. Make it easy for the client to reply in two minutes.

PROMPT 18

Write a polite reply to a prospect who says my price is too high. Offer options: a smaller scope, a payment plan or a different package. Do not apologize for the price.

Doing the work (prompts 19 to 32)

PROMPT 19

Read this transcript: [paste]. Extract the 7 strongest ideas, 5 quotable lines and 3 stories that could become social posts. Keep the speaker's voice.

PROMPT 20

Turn this article into 5 LinkedIn posts, 1 newsletter and 3 short captions for [audience]. Keep the tone [tone] and do not invent facts.

PROMPT 21

Create a 30-day content calendar for a [business type] in [city]. Mix education, social proof, offers and behind-the-scenes posts. Present as a table.

PROMPT 22

Write 10 Instagram captions for [business] about [topic]. Use the brand tone: [tone]. Add one call to action each, and vary the length.

PROMPT 23

Rewrite this paragraph in a clearer, warmer and more direct style without changing the meaning: [paste]. Give me 2 versions.

PROMPT 24

Here are a client's FAQs and policies: [paste]. Turn them into short chatbot answers. If information is missing, list the questions I must ask the client instead of guessing.

PROMPT 25

Write 30 tricky test questions for a customer support chatbot for [business], including vague, rude, off-topic and edge-case questions.

PROMPT 26

Describe my current process step by step: [paste]. Identify what can be automated, which tool could do it, where errors could happen and what needs human approval.

PROMPT 27

Write a clear handover guide for a client explaining how [automation or chatbot] works, how to fix common problems and how to switch it off.

PROMPT 28

Create an outline for a [type] template that helps [audience] solve [problem] in under an hour. List sections, fields and example entries.

PROMPT 29

From this job posting and resume, suggest 8 stronger bullet points using only facts I provide: [paste both]. Mark any bullet that needs client confirmation.

PROMPT 30

Fix punctuation, paragraphs and speaker labels in this transcript without changing the wording: [paste]. List anything unclear instead of guessing.

PROMPT 31

Translate this text from [language] to [language] for [audience]. Keep the tone [tone]. Then list any phrases that could be misunderstood or need a local adaptation.

PROMPT 32

Suggest 10 name ideas, 5 taglines and 3 brand personality descriptions for a [business type] aimed at [audience]. Explain the idea behind the top 3.

Quality, delivery and running the business (prompts 33 to 42)

PROMPT 33

Review this draft as a strict editor: [paste]. List factual claims to verify, vague statements, repeated ideas, and anything that sounds like generic AI writing.

PROMPT 34

List every statistic, name, date and claim in this text so I can fact-check it: [paste]. Do not verify them yourself. Just extract them in a table.

PROMPT 35

Does this draft match the client's brief? Brief: [paste]. Draft: [paste]. List what matches, what is missing and what goes beyond the scope.

PROMPT 36

Rewrite this client feedback into a clear list of tasks, ranked by priority, and flag anything that is a new request outside the agreed scope: [paste].

PROMPT 37

Draft a simple service agreement for [service] covering scope, deadline, price, deposit, revisions, ownership of the work, confidentiality and cancellation. Keep it plain English. I will have it reviewed before use.

PROMPT 38

Write a polite message to a client who keeps asking for extra work outside our scope. Offer a clear price for the extra work and keep the relationship friendly.

PROMPT 39

Write an invoice email for [client] for [project] amounting to [amount], due on [date]. Keep it friendly, clear and short.

PROMPT 40

Create a simple Google Sheets tracker structure for my side hustle: clients, hours, income, tool costs, status and next action. Include formulas for hourly rate.

PROMPT 41

Write a short, friendly case study from these notes: [paste]. Include the problem, what I did, the result and a quote placeholder. Do not invent results.

PROMPT 42

Create a weekly review checklist for my side hustle: outreach numbers, delivered work, income, what slowed me down and one improvement for next week.

Learning, growing and staying sharp (prompts 43 to 50)

PROMPT 43

Teach me the basics of [tool or skill] in 7 days. Give me one small, practical task each day, and a way to check I did it correctly.

PROMPT 44

I am stuck on this problem: [describe]. Ask me up to 5 clarifying questions, then give me three possible solutions with pros and cons.

PROMPT 45

Explain [concept] to me as if I am a smart beginner. Use a real-world example from [niche], then give me 3 questions to test my understanding.

PROMPT 46

Create a roleplay: you are a skeptical [client type] and I am pitching my [service]. Raise realistic objections one at a time and give me feedback after each reply.

PROMPT 47

Based on my first three jobs: [paste notes], suggest how to raise my prices, improve my process and choose better clients over the next 60 days.

PROMPT 48

Help me turn my best-performing service into a fixed package. Suggest a name, 3 tiers, what is included in each, and a pricing logic based on my costs of [costs].

PROMPT 49

Suggest 10 ways to use AI to cut the time I spend on [task] by half without lowering quality. For each, list a risk and how to check the output.

PROMPT 50

Act as my accountability partner. Each time I report my progress, ask three questions: what did I do, what blocked me, and what will I do next? Start with: [my update].

Start with one hustle.

Pick your niche, build three samples, and send ten messages a day. The plan in Chapter 7 is the whole job for the next 30 days.
